Certificate Addon

Academy LMS

Developer Guide

Source Code Structure:

We followed standard MVC structure within powerful Php Codeigniter framework to develop Academy.
	Structure of Certificate Addon: **Controllers** - **Certificate.php** : This is the controller we used for this addon. As the name suggests, it controls all the functions. **Models** - **Certificate_model.php** : All the functionalities related to database are done here. **SQL** - **updater.php** : If an addon requires modifications on existing database this file comes to play the role. **Views** - **index.php** - **certificate_settings.php** : These are the view files we used for this addon. **Others** - **index.html** - **Template.jpg** - **Plebeya.otf** - **Palatino.ttf** : These are the files we used for this certificate.

	Config.json : This is the skeleton of an addon. It contains the core data. It also describes all the actions made during installation. So do not change anything here.
